

Strikes Diversion Expenses (Imports Only)

Assurers will pay any additional expense incurred by the Assured when importing the subject matter insured following the exercise by the ship owner or charterers of any liberty granted by the contract of affreightment where solely in consequent of strikes, riots, civil commotions, lockouts or labour disturbances, or conditions arising from them, the subject matter insured is over carried to or discharged at a port other than the intended port of discharge under the contract of affreightment. The additional expense is payable irrespective of any other loss, where partial or total, recoverable under this policy.

However, Assurers will not be liable of any claims unless the liberty referred to is exercised prior to the expiry of 15 days from midnight on the day on which the strikes, riots, civil commotion, lockouts or labour disturbances cease to be in active operation.

Assurers' liability under this extension is limited to 20 per cent of the insured value of the subject matter insured or USD200,000 whichever is lesser any one loss or occurrence and in addition to the sum insured.
